

# Workers of Iniquity

Iniquity, is not an action as one might think. Iniquity is the character of an action. Have the workers of iniquity thought about this? I've heard it but didn't really understand its full meaning.

Iniquity has meanings such as evil, crookedness, perverseness, not upright or of moral distortion. Twisting the truth is a form of iniquity, as deception is a form of iniquity, as false promises are a form of iniquity. There are so many more. This is to plant a seed.

Then realizing something I've heard before; "the iniquity of my sins". It was not my action but the character of my actions. What is the character of an action? The character of an action is a collection of features and traits that form the individual nature of me, you, anyone. We only look at it in a justifiable moral or ethical quality that others may see. We do not look at this from Gods perspective. We look at our iniquities as a trophy. And as we've overlooked our iniquities which led us to this point in life, we still do not appear to see them.

Through the realization of our iniquities we may in a form of guilt in our minds, attempt to turn away from our realization of this iniquity, repent as many may say. Do we ever see it as a form of punishment? We see it is a "me" syndrome. Why is this happening to me? Why? Because "me" did it. "Me" chose unwisely in certain events which led to my understanding of our iniquities.

This would lead to bearing our iniquities. The bearing of our iniquities are the consequences of our actions. Some may be bearing the iniquities of others so as to take away the iniquities of that they deem important. What one should ask is am I bearing those iniquities of others for them or God? Big difference. It was demonstrated as to One whom did bear the iniquities of many. Yet today many still work in the dark, in vanity, mischief, naughtiness, perverseness, deceptiveness and as such these are the workers of iniquity.

And now as eyes open one can clearly see the workers of iniquity by the fruits of their labor, the actions of their hearts. They could be your next door neighbor, family member, co-worker, a business man, a corporation, an elected official or one wanting to be? Workers of iniquity are all around. All fruit is bad if it is futile.

It is time to understand our iniquities and the iniquities of the workers of iniquity and determine whether we will bear the consequences for those workers of iniquity actions. More importantly, think of the children. Our own plate is full of iniquities that we must address. Do we continue to encourage the workers of iniquity to the end? IT is a matter of choice.

The beauty of understanding our iniquities leads us to refrain from continuing our iniquities and walk in the path of acting in accord. However through this choice of acting in accord, it is not for one to justify their iniquities or the iniquities of others in order to reach our act of saving or protecting those from harm, risk, loss, destruction, etc. The choice is up to you.

Peace be with you,
